

PRINT Digital

Digital printing opened up new venues. My favorite is variable data. Using Python is always fun, manipulating hundreds of csv files with over 40,000 records.

My experience includes:

- ◆ Direct mail campaigns
- ◆ Email creation
- ◆ Extract - Transform - Load workflows
- ◆ IMb barcodes, QR Codes

Skills:

- ◆ Workflow creation and improvements
- ◆ InDesign advanced merge
- ◆ Excel advanced usage
- ◆ Python and pandas for ETL process
- ◆ Mail prepping software
- ◆ Variable data software for digital press file

Credit Cards

Credit card production is the most intricate offset work I've done. To produce one card, the substrate can go through the press as many as 8 times.

My experience includes:

- ◆ Develop procedure for complex workflow
- ◆ Train senior coworker
- ◆ Create samples on various substrates
- ◆ 4- and 7-color (stochastic) work

Skills:

- ◆ InDesign layout and scripts
- ◆ Illustrator and Pacz extensive use for:
 - * White underprints
 - * Varnish - matte and gloss
 - * UV coating for photo
- ◆ Photoshop color matching and correcting, press fixes
- ◆ Film positive for silk screening
- ◆ Fuji workflow for imposition and output
